

Aquashade® Aquatic Plant Growth Control

Precise blend of dyes control aquatic plants

More than a colorant. It's a precise EPA registered blend of dyes proven to control underwater aquatic plants by limiting sunlight available for photosynthesis through a specific blend of blue and yellow dyes.

Advantages

- Inhibits photosynthesis under water
- EPA registered
- Most effective in water deeper than two feet
- Use in conjunction with other herbicides or algaecides for control of surface algae mats or shallow-water plants

Application

- Pour directly into water
- Dispersion can be accelerated by applying in several areas around the treatment site, or allowing fountains/aerators to run
- For best results, apply early in the season, prior to plant germination

Water Use Restrictions

Wait 1 hour before swimming, irrigation or animal consumption. Do not apply to water that will be used for human consumption.

Specifications

Active Ingredient(s)	12.60% Acid Blue 9 1.04% Acid Yellow 23
Appearance	Dark blue liquid
Dosing	1 gal. per 4 acre-ft (at 0.8 ppm)

Packaging

SKU Number	Unit Size	Case Count	Case Weight (lb.)	Pallet Count	Pallet Weight (lb.)
