

Cutrine® Ultra Algaecide/Herbicide/Cyanobactericide

Effective broad range algaecide emulsified with a penetrating surfactant

A premium solution, **Cutrine® Ultra Algaecide/Herbicide/Cyanobactericide** is emulsified with penetrating surfactant which allows increased activity on 'hard to control' algae. Highly effective at controlling coarse (thick cell-walled) filamentous algae, mucilaginous (colonial) planktonic algae, Chara and copper-sensitive vascular aquatic plants.

Advantages

- Visible reduction in algae growth 1 - 2 days after application
- Double chelated formula prevents copper from precipitating out
- Emulsified with penetrating surfactant which allows increased activity on 'hard to control' algae

Application

- In still or slow waters, dilute the product with enough water to ensure even distribution and spray onto the treatment area.
- For moving waters, apply using drip irrigation or injection and continue treatment until waters at downstream area reach desired copper concentration.

Water Use Restrictions

Waters treated with this product may be used for swimming, fishing, further potable water treatment, livestock watering or irrigating turf, ornamental plants or crops immediately after treatment.

Specifications

Active Ingredient(s)	27.8% Copper Ethanolamine Complex, Mixed (9% metallic copper)
Appearance	Dark blue liquid
Dosing	0.6 - 3.0 lb./acre-ft

Packaging
